## Putting the Parent in Charge of their Child's Education

### Education Savings Account (ESA)

- Parents may establish a state-controlled Education Savings Account ("ESA") for each TK-12 child in California.

### Funded \$17,000 Each Year Using Prop 98 Money

- Annually, the account receives the student's share of Prop 98 funds, starting around \$17,000 in the first year and increasing yearly with California's economy. No tax increase.

### Choose an Accredited School

(Public, Charter, Private, Parochial, or Homeschool)

- Parents enroll their child in a participating accredited school and direct the state to distribute ESA funds to cover tuition and educational expenses. Parents don't touch the money; the transaction occurs between the state-controlled ESA and the chosen accredited school.

### Unspent ESA Funds Carry-Over and Earn Interest

- Unused funds in the ESA carry over, earning interest for future education expenses.

### ESA Funds can be used During the Student's Lifetime

- Unused funds after 12th grade can be applied to education throughout the child's life, including trade schools, colleges, and postgraduate studies.

### ESA Funds can be Transferred to Another ESA

- Unused ESA funds may be transferred or gifted to another student's eligible ESA or a participating accredited school.
