CAN YOU BELIEVE IT ?????

Wednesday, June 17, 2026 | Vol. 28

SO, WHO ARE THE TRUE PATRIOTS?

As we near July 4th and the celebration of the 250th year of our independence, we look back and remember the events of the American revolution of 1776 that shaped our country, and brought us the independence we enjoy today to live our lives freely from the tyranny of the British crown. The events of the American revolution united the 13 colonies in a faraway land into what would become known as the “United States of America”.

Just as the British retaliated against those patriots in Boston who participated in the Boston Tea Party to protest the tyranny of the British crown, so did the Democrats retaliate against the J6'ers in 2021 who protested against what they believed to be the tyranny of the Democrat political machine to “steal” the 2020 presidential election. It was impossible to believe that a brain addled man who had campaigned from his basement would receive 81 million votes, or 10 million more votes than Donald Trump. It was Trump's campaign that drew millions of patriots who came to hear him speak; they participated in boat parades, public campaign events, and street events waving American flags, honking their horns, and cheering him on. The Democrats' political darling, Barack Obama, had received 66 million votes to win his 2012 presidential election, so how on earth did this unpopular politician known as Joe Biden, who campaigned from his basement and had difficulty putting two sentences together, receive 15 million more votes than Obama and 10 million more votes than Trump? That statistical anomaly still remains today.

These J6'ers who protested the 2020 election were hunted down, arrested, and thrown into jail. Similar to those patriots in 1775, many of the J6'ers lost their livelihoods and their homes, and spent years locked up in jail for protesting what they believed to be the tyranny of the Democrat political machine. The American patriots of the Boston Tea Party were sending a message to the rulers of England to protest what was known as the Stamp Act, which they declared was "taxation without representation". The J6'ers were sending a message to the Democrat party machine that the presidential election of 2020 was not free, and without question, was not fair. It was an abomination.

The protests at the country's capital by the J6'ers was the beginning of a political re-awakening and the forerunner of what is now known as "The Save Act". January 6th was an event wherein the citizenry recognized and believed that something untoward was happening in our country and in our elections. The most recent election in California has added to the deep suspicions that our elections are being stolen by what one conservative patriot has called "legal fraud". That is, the Democrats have designed our elections to be so fraught with holes that it is now easy to commit fraud and "legally steal elections". Their accusations that Republicans are trying to "suppress the vote" through the Save Act, which ensures the integrity of our elections, is truly laughable.

Following the recent primary elections in California, in which Republican Spencer Pratt lost by a statistical improbability to a Democrat Socialist, the June 10, 2026 headline in *American Thinker* read, "**Even 'Trust the Election Pundits' are Suspicious**". According to the article:

"California Democrats have rigged another election, and outsider Spencer Pratt has been bumped from the Los Angeles mayoral race. On Election day, Pratt's lead over third-place Nithya Raman was so large that she publicly cried over her loss. After a week of mail-in-ballot shenanigans, Raman has surged to secure a coveted spot on the November ballot — a statistical improbability in any jurisdiction familiar with arithmetic and basic ethics.

CALIFORNIA'S VOTER REGISTRATION ROLLS AND IT'S INHERENT FRAUD

Many of you may have already heard about the ridiculousness of proving your identity when registering to vote in California. According to the California Code of Regulations, 20107, the following is acceptable proof of identity when registering to vote:

1. *driver's license or identification card of any state;*
2. *passport;*
3. *employee identification card;*
4. *identification card provided by a commercial establishment;*
5. **credit or debit card;**
6. *military identification card;*
7. *student identification card;*
8. **health club identification card;**

9. *insurance plan identification card; or*
10. ***public housing identification card.***

Seriously? Is it any wonder why we question California's Voter Rolls and its mail-in ballots that cannot be verified? Add this to the shenanigans revealed on June 9, 2026 by the *N.Y. Post*, which stated, "***Thousands of homeless voters were registered to vote at LA shelters — despite many not living there or the facilities not having any beds.***" Fake voter registrations and fake mail-in ballots, anybody?

Are there dead voters on the voter rolls, non-citizens on the rolls, non-residents on the rolls...probably. California still refuses to have their voter rolls verified. In the *American Thinker* article quoted above, the article's author makes the following additional assertion:

In many Democrat-controlled jurisdictions, multiple ballots arrive at every home, apartment, post office box, chicken coop, doghouse, street corner, vacant field, Walmart, convenience store, parking lot and homeless encampment. American citizens don't control election outcomes through their votes. Campaign operatives control election outcomes...blank ballots are mailed out, filled out, and collected without ever involving the 'voters' whose 'votes' are cast in their names."

Can You Believe it? YES!!!

It is time for us to recognize the J6'ers as patriots who protested the improbability of the 2020 election. They were, like the founders of our country, protesting the tyranny against America's citizens and re-awakening us to the founding principles of the American constitution and the integrity of our elections. The patriots of the Boston Tea Party, and those that followed in the American Revolution, paid the price to ensure that the rest of us could live free. They were America's original patriots. The J6'ers followed the same path and deserve our respect for their sacrifice.
